

## FRONT END DEVELOPER TEST

**Version:** 1.2

## Front End Test

The goal of this exercise is simple: given the following JSON, generate a list of elements that looks like the screenshot.

It doesn't have to look exactly the same you'll have to respect a few rules:

- You should be using Javascript to organize the data and display it using HTML + CSS.
- All containers should have the same width (200px )
- All pictures should be in the middle in their container (vertically and horizontally)
- Item names should be "ellipsed" if too long
- The "from ShermansTravel" text should be replaced by the "Brand" field in the JSON object
- BONUS: the design should be responsive (display as many columns as possible, centered on the screen)

JSON:

```
Var result = {
  "marks": [
